

STEEL STRAPS

These straps have an "E" thickness from 1 to 1.8 mm depending on their composition and diameter.

The standard steel versions are painted black and the stainless steel versions are uncoated. Sold individually in a plastic bag.

Four fastening points at the Close of each loop and the shape of the strap mean that the trunnion and screw can be rotated easily.

ALK Ref. Steel	E	ALK Ref. Stainless	E	Tank Diameter = D	R	A	J	L
81.150.00	1,5	82.150.00	1,0	150	75	33	67	474
