

Full mounted clamp
with "A" type support

Locking System:

- 1 - Unthreaded trunnion
- 2 - Insulating plastic strap
- 3 - M8 "Allen" Screw
- 4 - Threaded trunnion
- 5 - Security Tip
- 6 - M8 nylstop nut

TYPE "A" STAMPED SUPPORT

This type of support allows for 55 mm between the frame and the tank. It accepts straps up to 35 mm wide.

TYPE "B" STAMPED SUPPORT

This type of support allows for only 23mm between the frame and the tank. It accepts straps up to 35 mm wide .

TYPE "A" STAMPED SUPPORT

Steel with a thickness of 4 mm .

Electrogalvanised and coated with 50 micron thick layer epoxy black paint.
Distance between the chassis of the vehicle and the top of the tank = 55 mm.
These supports accept straps up to 35 mm wide and are attached to the chassis by two M10 screws (not included). Sold individually in a plastic bag.

"STAMPED" Support

STEEL

TYPE "B" STAMPED SUPPORT

Steel with a thickness of 5 mm.

Electrogalvanised and coated with 50 micron thick layer epoxy black paint.

Distance between the chassis of the vehicle and the top of the tank = 23 mm.

These supports accept straps up to 35 mm wide and are attached to the chassis by two M10 screws (not included). Sold individually in a plastic bag.

STEEL STRAPS

These straps have an "E" thickness from 1 to 1.8 mm depending on their composition and diameter.

The standard steel versions are painted black and the stainless steel versions are uncoated. Sold individually in a plastic bag.

Four fastening points at the Close of each loop and the shape of the strap mean that the trunnion and screw can be rotated easily.

INSULATING PLASTIC STRAPS

These straps are 1,10 mm thick and prevent the steel strap and the support coming into contact with the air tank. They have their own fastening system and remain in position when fastened. Sold individually in a plastic bag.

LOCKING SYSTEM

Identical for all clamps, it consists of an M8 "Allen" screw (1), with a trunnion Dia:16 mm non-threaded (2), with a trunnion Dia:16 mm threaded (3), with a security tip (4) and a Nylstop safety nut (5). Available in ST37 steel "Autoblack" or stainless steel. Sold individually in a plastic bag.

ALK Ref.	Tank Diameter = D	M	L	Material
85.000.00	All diameters	M8	90	ST37 Autoblack steel
86.000.00	All diameters	M8	90	SS409 stainless steel

Dimensions in millimetres

D = External Diameter of the Tank in mm

This fastening system prevents the steel strap and support coming into contact with the air tank.

1 - Position and tighten the two plastic straps.

2- the support **"ON"** the plastic straps to prevent them coming into contact with the air tank.

3- Place the steel straps **"ON"** the stamped support and **"ON"** the plastic straps. Tighten with a N°6 ALLEN key.

4- Tighten and secure the entire unit by fitting the two security tips with the two NYLSTOP nuts.
